SUMMARY

I am an aspiring Frontend Developer and Computer Science Engineering student with practical experience in building interactive web applications using React.js, JavaScript, and Tailwind CSS. I have developed a passion for responsive UI development, API integration, and creating engaging user experiences while deepening my problem-solving skills through Data Structures and Algorithms

EDUCATION

Bachelor of Technology (B. Tech)

St. Mary's Group of Institutions

India 2022-2026

Higher Secondary Education

Sri Chaitanya Junior Kalashala

India 2020-2022

Secondary School Certificate (SSC)

St Nissi High School

India 2010-2020

EXPERIENCE

Web Development Intern — Renix

- Contributed to frontend development projects by building modern and responsive UI components using React and Tailwind CSS
- Worked closely with team members to implement new features, fix bugs, and maintain consistent design standards across applications
- Improved application usability and mobile responsiveness through UI optimization and performance enhancements

CERTIFICATIONS

JavaScript Essentials 1

Cisco Network Academy

Front-End Development Libraries Certification

FreeCodeCamp

OCI AI Foundation Associate

Oracle university

SKILLS

React	JavaScript	Vercel	Tailwind
HTML5	Responsive Web		Git
REST	Google Map's API		GitHub
CSS3	Performance Optimization	ES6+	

PROJECTS

[Personal portfolio](#)

Personal portfolio website showcasing frontend projects

- Showcasing frontend projects, skills, and developer profile
- Built to highlight project work, technical skills, and provide easy access to contact and GitHub repositories

[Mood Drift](#)

A mood-based place recommender web application

- Developed a web application recommending nearby places based on user mood, budget, and company preferences
- Integrated Google Maps and Places API to fetch real-time location data and display interactive map markers

[Snooker Scoreboard](#)

Snooker Scoring & Match Tracking Application

- Developed a real-time snooker scoring web application using React, Tailwind CSS, and Framer Motion for smooth and interactive gameplay tracking
- Implemented live score calculation, frame management, foul handling, and match history with persistent local storage support
- Built a responsive and installable Progressive Web App (PWA) featuring custom themes, mobile-friendly UI, animations, and offline accessibility
